

What is Security Compliance Hub?

From a security assessment to an auditor-ready report, in one platform.

Security Compliance Hub assesses an organisation against the frameworks it has to meet, from Cyber Essentials and ISO 27001 to NIS2, DORA and SOC 2. **Our engine works out where it stands, in each standard's own terms; Phronesis, our AI, explains what that means and what to do next;** and the result is a report an auditor, a board or a customer can rely on.

Every framework they face

20 assessments across UK, EU and US standards, from Cyber Essentials, ISO 27001, ISO 42001 and the CAF to NIS2, DORA, SOC 2, CMMC, HIPAA and SOC-CMM.

A verdict you can defend

The same answers always give the same result, in the standard's own terms. **No invented pass marks:** a CE submission verdict, CAF outcomes at target, a CMMC SPRS score.

Explained, not just scored

Phronesis turns the result into an executive summary, the priorities and their root causes, and **a roadmap to the target** the organisation chose.

Ready for the auditor

Each gap comes with what good looks like and the evidence to keep. Connected tools **check the answers**; the Audit Pack bundles it all, risk documents too.

Answer once

A finalised answer shows up on the **related questions of other frameworks**, so the same control isn't researched and evidenced five times over.

Built for MSPs and vCISOs

The **MSP Portal** runs every client from one place: per-client assessments, scores and connected tools, with editor and viewer roles for your team.

YOUR SUPPLIERS TOO

Third Party Risk Hub

Supplier assurance that doesn't stop at the questionnaire.

Send

A security questionnaire to every supplier, by secure link.

Verify

Risk Purview checks their answers against what their internet-facing estate shows.

Track

Weekly re-scans, drift alerts and incident broadcasts.

Risk Operations is the subscription that puts the Assessment Bundle, risk management included, and the Third Party Risk Hub together: your own compliance and risk, and your suppliers', in one place.

WHO IT'S FOR

Organisations working towards certification · regulated firms (NIS2, DORA, CAF) · MSPs and vCISOs · security operations centres · defence and US government suppliers · private equity deal teams · procurement and supplier risk teams

See it on your own organisation

Start with the free Compliance Readiness check, no account needed, or ask for a demo and a sample report for the framework that matters to you.
